MINIBULL BAGLESS INDUSTRIAL VACUUM

ASPIRATORI INDUSTRIALI WET&DRY MONOFASE

The **Minibull** is a **powerful** and **versatile bagless industrial vacuum**, useful for different **professional applications**. This vacuum cleaner is equipped with **two By-Pass motors** that work in parallel and ensure maximum **suction performance**. The filter is in sturdy polyester **M Class** (1 μ filtration efficiency) to stop even **fine dust**. A different filter can be installed on this model depending on the application. **Teflon water-repellent filters**, **Nomex 250°C resistant filters**, and filters with **PTFE treatment** for more binding and **difficult dust** are also available. This **industrial vacuum** is equipped with a large 45 Lt detachable **container** that allows the operator to empty the vacuumed material easily. Disposable collection bags can also be used. A floating system can be provided in the container to **vacuum liquids** in complete **safety**.

HIGHLIGHTS

SUCTION UNIT

The vacuum is generated by 2 by-pass motors. Each motor is managed by an independent switch, permitting the operator to control the intake performance. The motors are located in a sturdy casing, with an insulating sponge to maintain a low noise level.

MANUAL FILTER SHAKER

On one side of the filter chamber there is an ergonomic manual shaker through which the operator can easily and quickly clean the filter, removing any dust and debris from its surface. Thanks to this smart cleaning system the operator can carry on working without needing to change or wash the filter.

FILTERING ELEMENT

The filtration is guaranteed by an M class polyester filter. The star shape enables air to flow through the filter even when it is dirty. The fabric of the filter is classified as M Class (BIA | EN 60335-2-69). This means that all particles till 1 micron are stopped by the filter so as to protect the motors and the operator around the vacuum cleaner.

COLLECTION BIN

The material is collected inside a painted container equipped with a metal handle which enables the bin to be detached from the machine. Thanks to its 4 swiveling wheels, the bin can be easily moved and emptied.
