DEPURECO INDUSTRIAL VACUUMS

Our mission is to provide our customers with powerful, efficient and durable cleaning systems based on three fundamental principles: quality, safety and reliability. With a wide range of products, a global service network and the expertise to provide customised solutions, we are ready to support your business in any vacuum challenge.
 Choose Depureco for a superior, safe and reliable industrial cleaning experience.

VACUUM CLEANERS FOR INTEGRATION ON MACHINERY

- Compact models, ideal for installation directly on industrial machinery.
- Multi-stage filtration with optional HEPA filter for maximum safety.
- Ideal for preventing cross-contamination in the food or pharmaceutical industries.

CENTRALIZED INDUSTRIAL VACUUM SYSTEMS

- Simplifies and speeds up the cleaning of entire buildings.
- Fully customisable systems.
- Simultaneous suction in several places.

COMPRESSED AIR VACUUM CLEANERS

- Ideal in contexts with little available electricity.
- Wide range for every use.
- Also available for use in ATEX hazardous areas with 1/2D certification inside the vacuum cleaner.

INDUSTRIAL PRE-SEPARATORS

- Increases storage capacity up to 600 Lt
- Simple and safe to handle
- Possibility of choosing different discharge systems for the vacuumed material.

HIGH PERFORMANCE VACUUMS SINCE 1972

SINGLE-PHASE INDUSTRIAL VACUUMS

- Compact, handy and easy to use vacuum cleaners equipped with 2 or 3 single-phase motors.
- 1 μ filtration degree (0.18 μ optional with HEPA filter).
- Dust collection capacity of up to 100 Lt.
- Liquid collection capacity of up to 130 Lt.

INDUSTRIAL DUST COLLECTORS

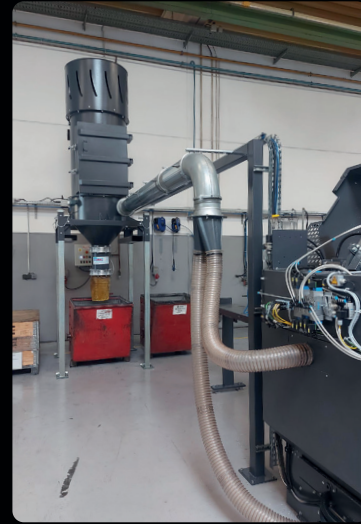

- High air flow rate for extracting fine suspended dust.
- Prevent dust dispersion in the working environment.
- Available with suction arm or for direct connection to production machinery.

INDUSTRIAL VACUUMS FOR OIL AND SWARF

- Vacuum cleaners for cleaning CNC tanks in the metalworking industry.
- Separation of oil from chips and reuse of filtered oil.
- Reduction of machine downtime and maintenance time.
- Tank capacities from 70 up to 1000 Lt.

THREE-PHASE INDUSTRIAL VACUUMS

- Equipped with side channel blower, up to 25kW
- Suitable for continuous operation even in heavy applications
- Container capacity up to 175 Lt.
- Highly customisable.

ACD AND ATEX INDUSTRIAL VACUUMS

- Suction in potentially explosive atmospheres.
- Single-phase and three-phase vacuum cleaners suitable for working in potentially explosive zones (Z2 - Z21/Z22).
- Units certified 1/2D and 1/3D (zone 20 inside the vacuum cleaner).
- Fully grounded.
- Suction of combustible dusts in classified or non-classified zones.

INDUSTRIAL VACUUMS FOR WELDING FUMES

- Extraction of welding fumes from welding torch or via fume hood.
- 1 μ filtration degree (0.18 μ optional with HEPA filter).
- Articulated extraction arm.
